CERTECH – Supporting quality installation, compliance, and long-term network performance.

DATA CABLING FUNDAMENTALS TRAINING

Built for Electricians & Contractors

COURSE OVERVIEW

CERTECH, MM Connectivity & MM Mackay

have partnered to bring you the
"Data Cabling Fundamentals Training"

Designed specifically for electricians and contractors, this hands-on training session covers real-world structured cabling installation, compliance, and testing. Learn how to install Cat 6, Cat 6A and fibre optic cabling that is fit for purpose, compliant, meets your customer's needs, and performs reliably from day one.

BUILD CONFIDENCE. Install with certainty. Deliver compliant, high-performance networks.

WHAT YOU'LL LEARN

- Relevant Standards – Understanding compliance and fit-for-purpose requirements
- Rough-In Best Practice – Cable pathways, separation, bend radius and handling
- Termination (CAT6 & CAT6A) – Ensuring reliable performance and avoiding common faults
- Pair & Continuity Testing – Early fault identification
- TCA1 Forms – When and how to complete correctly
- Open Cabler Licence – Requirements and responsibilities

THE TRAINER

Thomas Boer is an experienced telecommunications professional holding a Certificate III in Telecommunications Cabling and an Open Cabler Registration. With more than 20 years of structured cabling installation experience and 5+ years as an industry trainer, Thomas provides practical, real-world guidance focused on quality, compliance, and best practice.

WHY ATTEND

- Deliver higher quality installations
- Reduce install time and rework
- Avoid costly compliance issues
- Improve testing pass rates
- Increase confidence on site

WHO SHOULD ATTEND

- Electricians
- Data cablers and installers
- Contractors and technicians
- Project managers and supervisors
