

**Increase Safety.....Reduce Time/Cost - Significantly.**

## The Structural Steel Clamping System by Skopit

Engineered and Manufactured in Far North QLD

Attach Clamp in minutes to beam or Column for mechanical or electrical installations

Avoid the risks of welding, drilling, grinding, cutting or painting.

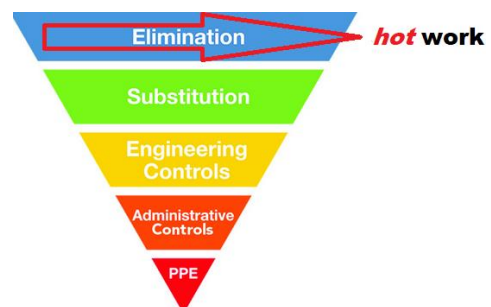

- Eliminate Hot Works
- Reduce Installation Time
- Reduce Installation Cost
- Install Multiple Equipment at Once
- Reduce Corrosion Risks
- Keep Steel Work Integrity Intact
- Galvanised or 316 Stainless Steel
- Load test reports available on request

### Testimonial

*“Skopit clamps were used to secure the transportable office beams to the strip footings, this was very efficient method as no welding was required”*

**GRM Autonomous Project.**
